General Info

Full Name : Mohd. Iqbal A. Al-Quran
Place and DOB : Irbid-Joradn, 6th of August 1983
Nationality : Jordanian
Marital Status : Single
Hometown : Beirut – Lebanon

Objective

Developing usable standards –compliant website based on web 2.0 and web 3.0 (semantic) technology, and intend to pursue a career that allows me to make the web a better place. I like working on projects that involve a mix of web development, database management, web & graphic design, and prefer doing web development part with MVC web framework like Rails and being a part of team using SCRUM as a project management methodology, I like to develop native and web based mobile applications too. I want to be a member of creative and innovative team to share ideas that will produce outstanding solution.

Experience

Project Manager / Software Engineer **1/5/2008 - now**

Naharnet (Beirut – Lebanon)

Major accomplishments

- Managing a small team of four rails developers, one web designer and one graphic designer. I used SCRUM as a project management methodology, and Basecamp to manage and track projects.
- Developing, deploying and maintaining www.tahawor.com site.
- Developing, deploying and maintaining www.naharna.com site based on web 3.0 and semantic (RDF) technology.
- Developing, deploying and maintaining <http://elections.naharnet.com> site .
- Applying Test/Behavior Driven Development approaches to software development

Software Engineer **1/11/2007 – 10/4/2008**

TootCorp(Amman –Jordan – Wadi Saqra)

I'm responsible for development of the company sites (www.ikbis.com , www.watwet.com and www.itoot.net) and adding new features for them using rails framework as a primary web development framework language. I'm also responsible of managing all the information technology needs of TootCorp network, sites administration, and other security issues .

Major accomplishments

- Creating (developing, designing and deploying) a Facebook application for watwet site using rFacebook library. (<http://apps.facebook.com/watwets/>)
- Modifying booth www.ikbis.com and www.watwet.com sites to web 2 technology and Ajax bases.
- Building a mobile based app for ikbis site and integrate it with nokia N series .
- Developed several Ruby on Rails applications for internal and external use.

- Developed a set of standards-compliant SEO-friendly templates, and widgets for use on our site.
- Developed several plugins for internal use.
- Managing and administrating sites servers.

Web developer

12/6/2007 – 25/10/2007

Jeeran (www.jeeran.com)

Jeeran is the biggest Arab social network and blogging site with more than 1 million active member, I was working there as a web developer using Microsoft technology (.NET, C#, Microsoft SQL server, ..). I made so many changes regarding look and feel of the site (GUI) and tried to make it based on web 2.0 technologies. I made the first Arabic Facebook application.

Major accomplishments

- Creating the first arabic facebook application for Jeeran site (Jeeran Blogger) using .NET framework, FBML, FBJS and other technologies. The application lets you quickly and easily integrates your existing blog into your Facebook profile. Get more exposure for your blog and share your content with friends and a lot more. (<http://apps.facebook.com/jeeranblogappdemo/>)
- SQL Queries, Stored Procedures, Database Design & Architecture

Computer Engineer

2004 - 2005

MobileCom (www.mobilecom.jo)

MobileCom is one of the leading telecommunications operators in Jordan. My graduation project (Hotels Reservation using WML and GPRS) was a result of cooperative between MobilCom and Yarmouk university. I worked there for 6 months on the project.

Education

B.Sc. Computer Engineering – Yarmouk University –Hijjawi Faculty for Engineering Technology 2007

- Project I: Hotels Reservation System using WML and GPRS
The project is a result of a cooperation between Orange (A leader company in telecommunication field) and Yarmouk University
- Project II: Vehicles Registration System using .Net and MySQL DB Server

Skills

- Web Development and Design
 - Excellent knowledge of Ruby on Rails web framework
 - Comprehensive knowledge of XHTML, Javascript and CSS for designing UI
 - Very good working knowledge of ASP.NET framework (1, 2 and 3.5) using C# and VB with visual studio IDE
 - Very good knowledge using jQuery and Prototype javascript framework for UI
 - Excellent working knowledge of RDBMS, including MySQL, Microsoft SQL Server, and Access
 - Very good working knowledge of JAVA (J2EE) including Swing, JSP, Servlets, RMI and JDBC. (sun certified java programmer SCJP)
 - Excellent working knowledge of AJAX, XML, RSS, REST architectures and other various cross-site data exchange technologies
 - Working knowledge of developing Web 3.0 sites using semantic and RDF approach.

- Excellent usage of Facebook API and Google Maps API
- Well versed in Test/Behavior Driven Development approaches to software development using unit test and spec test framework
- Working knowledge of many source control systems: Git, CVS, Subversion and Visual Source Safe
- Good knowledge using Photoshop and Illustrator for graphic design
- Good experience with SCRUM as a project management methodology
- Very good experience of deploying websites on cloud servers like AWS
- Good usage and working with CMS sites
-
- Programming Languages
 - Excellent knowledge of Ruby including Metaprogramming and Ragel techniques
 - Very good knowledge of C# and VB
 - Good knowledge of java and J2EE
 - Very good knowledge of Javascript
 - Comprehensive knowledge of XHTML, Javascript and CSS for designing UI
 - Basic knowledge of Erlang concurrent programming language
- System Administration and Networking
 - Networks skills such as Trouble-shooting network and server problems, TCP/IP and Internetworking, Network design and Internet connection. (Cisco CCNA certification)
 - Extending Switched Networks with VLANs, Determining IP Routes, Managing IP traffic with Access Lists, Establishing Point-to-Point connections, and Establishing Frame Relay Connections
 - Good knowledge of the GNU/Linux operating system and it's derivatives
 - A thorough understanding of the processes and tools necessary to deploy Ruby on Rails applications, using Apache/nxinx, Mongrel, Capistrano, and MySQL
 - Using, installing and configuration of the following operating systems: (OS X , MS-DOS, Microsoft Windows (3.x, 95-98, ME, XP, 2000, Vista), Microsoft Share point Server (MOSS 2007), Linux (Red Hat, Ubuntu, Debian distributions)
 - Good usage of Subversion Version Control, CVS (concurrent Versioning System)
- Mobile Application Development
 - Building web based mobile applications for iPhone using iUI
 - Building Native Mobile Application for iPhone, Windows Mobile, RIM and Symbian using rhomobile mobile framework
 - Building application using WML and mysql for backend mobile applications
- Mobile Application Development
 - Building web based mobile applications for iPhone using iUI
 - Building Native Mobile Application for iPhone, Windows Mobile, RIM and Symbian using rhomobile mobile framework
- Desktop Application Development
 - Excellent developing windows based desktop application using visual basic, C++, Ruby
 - Good usage of java applet
 - Development of a useful applications using VBA (Visual Basic for application)

- Hardware
 - Hardware assembling and maintenance
 - Dealing with computer hardware and Digital Logic Design using Assembly Language
- Internet skills
 - Search Engines Optimization: Enhance web pages for better rankings in the major search engines and directories such as Google, yahoo.. etc
- Good command of the use of computers for modeling, programming, solving applied engineering problems
- Excellent communication and technical writing skills

Languages

- Arabic : Native speaker, with excellent writing skills.
- English: Very good reading, writing (Technical writing, RFP's, Proposals) , and speaking skills.

Certifications

- Sun Certified Programmer for Java 2 Platform 1.4 (SCJP)
- Cisco Certified Network Associate (CCNA)
- Full Driving License

Interests

- Open Source and Security Issues
- Soccer (Player in the Yarmouk University Soccer Team)
- Listening to Jazz music (I'm not boring guy tho)
- International traveling
- Reading (specially for Fredrick Nietzsche and Darwin)
- Keeping up with the latest news and technologies concerned with Information Systems
- International Events (I have provided support to the World Economic Forum WEF in three different occasions as an external stuff, the last one held in Dead Sea-Jordan)
- Environmental Issues

Other Activities

- I participated in many commercial advertisements as a model member of Lana Bisharat Modeling Agency
- I had represented my university (Yarmouk) in so many international events as an active student
- I provided support to the World Economic Forum (WEF) in three different occasions and performed different duties that were assigned to me showing great flexibility, commitment and teamwork.

Dear Sir/Madam,

My name is Iqbal, and I'm a 26 years old computer engineer working on web development as a software engineer.

I can describe myself as an ambitious, determined, very social, and looking for Perfectionist.

I have a solid experience in software development booth (desktop and web development) for commercial and Institutional uses where I developed integrated software for many institution and sites.

I have a variant skills specially in programming and networking fields and I hold both (SCJP and CCNA certifications) and I am experienced in several java technologies including Swing, JSP, Servlets, RMI, JavaMail and JDBC, and very powerful in web development using ASP.NET2.0 under Visual Studio 2005 IDE. But most of all I enjoy developing a web sites based on web 2 technology and ajax using Rails web framework.

I possess distinctive skills using the computer for solving applied problems and I'm very powerful in the area of computerizing/automating the traditional used techniques. I'm able to work under pressure and with a group as a team player in addition to learn easily.

Eqbal
